WHAT YOU NEED

Typical LUMIN system components:

|	
LUMÏN Music player	**LUMÏN** L2 Music library & switch
Android or iOS Tablet/Phone Running LUMIN App	**Home Network** Including Wi-Fi
Computer (PC or Mac) For music management and tagging	**Amplifier & loudpeakers**

TYPICAL NETWORK

OPTION 1

The simplest network uses copper Ethernet from your Router into LUMIN L2 and then Fibre from L2 into your LUMIN Player:

ROUTER WITH Wi-Fi — L2 — LUMÏN — OPTICAL NETWORK

CAT5e or faster Ethernet Cable

SFP LC Module   SFP LC Module

LC Connector   LC Connector

LC Duplex Fibre Optic cable

OPTION 2

LUMIN L2 can also be electrically isolated from the network, by adding a separate fibre network switch:

ROUTER WITH Wi-Fi — GIGABIT SWITCH WITH SFP SLOT — L2 — LUMÏN — OPTICAL NETWORK

CAT5e or faster Ethernet Cable

SFP LC Module   SFP LC Module   SFP LC Module

LC Connector   LC Connector   LC Connector

LC Duplex Fibre Optic cable   LC Duplex Fibre Optic cable

**For more fibre networking advice including tested equipment, please visit www.luminmusic.com**
POWER

Power is required for all LUMIN L2 functions including USB connection to computer.
Make all other connections first and then use the included Mains Power Cable to connect LUMIN L2 to your Power Outlet.
Then turn LUMIN L2 on using the rear switch.

POWER IN
100-240V AC

ON/OFF

L2

Power Outlet type and Power Cable differ from country to country. Ensure you use the correct type.

When turning LUMIN L2 off, the standby button should be used to unmount the disks, then the front panel display will show a message when it is safe to turn off the power switch.

ADD MUSIC VIA USB

USB can be used to add music to LUMIN L2 and provides the fastest transfer speeds (around 5x the speed of Gigabit Ethernet).

USB TO COMPUTER

L2

PC/MAC

Included USB 3.0 Mico B cable

Note: While 'USB TO COMPUTER' is connected, LUMIN L2 will not be discoverable on the network.

LUMIN L2 will appear as a USB Disk on your computer and you can move/copy/delete music as you would any other external disk drive

L2

PC/MAC

When finished, use your operating system's recommended method to safely 'eject' LUMIN L2 and power-off L2 using the method described above.
ADD MUSIC VIA NETWORK

Connect the network as shown in 'Typical Network', ensuring that the computer containing the music is on the same network as LUMIN L2.

Connect and power-up all network devices, LUMIN L2 and your computer.

WINDOWS

Open Windows Explorer and enter "\\" followed by LUMIN L2's IP address or friendly name (hostname) into the address bar, then press the Enter key.
Note: The default hostname is LUMIN-L2

LUMIN-L2

File   Home   Share   View

\\LUMIN-L2

Quick access
This PC
Network

public
LUMIN L2 Public folder

MAC

Open Finder and click Go > Connect to Server, then enter "smb://" followed by LUMIN L2's IP address or friendly name (hostname). Press 'Connect'.
Note: The default hostname is LUMIN-L2

Connect to Server

Server Address:
smb://LUMIN-L2

Favorite Servers:

?   Remove   Browse   Connect

Once connected via SMB, you can simply drag and drop your chosen music from your computer disks to the 'public' folder on LUMIN L2 as you would any other network drive.
SERVING MUSIC

LUMIN L2 will scan for new music automatically on power-up, when USB disconnected, or after a significant transfer.
During scanning, the front panel display will show scanning progress:

50%   Scanning Music Library
312 /623 items

Once scanning is complete, all new music will be available to play.

On the LUMIN App in Settings > Music Library, select 'LUMIN L2' from the list

Music Library

LUMIN L2

Your music collection will now be available to browse and play through LUMIN and the LUMIN App.

FITTING DISK DRIVES

LUMIN L2 can be ordered without disks or they can be changed at any time.
Disk specification:

2.5" SATA III SSD   Single partition only   Identical pair

For instructions on how to gain access to LUMIN L2 internals and fit disks, please see the full online manual www.luminmusic.com/manual
